SUMMARY

A front-end developer with expertise in JavaScript, React.js, and responsive web design. Currently pursuing a Master of Computer Applications (MCA), I have experience developing dynamic projects, including a browser-based dice game and an Employee Management System. I demonstrate strong analytical, collaborative, and leadership skills, which enable me to achieve significant results in fast-paced environments.

EDUCATION

Master of Computer Science and application (MCA)   07.2023 – present
Pimpri Chinchwad University, Pune

Bachelor of Computer Science and application(BCA)   07.2020 – 07.2023
Jiwaji University of Gwalior

SKILLS

- Programming Languages: JavaScript , Java
- Development Technologies : HTML, CSS, React.JS, Next.JS, Tailwind CSS
- Databases: MongoDB, MySQL
- Core Skills: Object-Oriented Programming
- Development Tools & Version Control: Git, GitHub, VS Code

PROJECTS

Employee Project Management System (EMS)
A project management system designed with a focus on task management and performance tracking. Key features : Employee dashboard for task tracking and a robust admin dashboard for task creation and project oversight. The system is engineered with employee workload optimization, featuring user-friendly components for task acceptance, failure tracking, new task assignment, and task completion.

Dice Game
Created a browser-based dice game featuring dynamic score calculations and interactive gameplay using JavaScript and DOM manipulation. Implemented responsive design with CSS to ensure cross-device compatibility.
